Email : jadonharshitmca@gmail.com

Mobile : 9760204775

CAREER OBJECTIVE

Constantly seeking to engage my knowledge to learn something useful and keep challenging myself to be a better performer in accordance to the company's requirements. Good and quick learner, team player, love to learn new things, flexible with different technologies.

SKILLS SUMMARY

- **Programming Languages** : Python, SQL, C, Java, HTML .
- **Tools & Technologies** : MySQL, Data Analytics, Power BI, Kali Linux, Pandas, NumPy, AI/ML.
- **Soft Skills** : Analytical thinking, Problem-Solving, Attention to detail , Organizing.
- **Developer Tools** : VS Code, PyCharm, Jupiter Notebook, Git/GitHub.

EDUCATION

- | | |
|--|---------------------|
| • School of Engineering and Technology CSJM University Campus | Kanpur, India |
| Master of computer Application ; CGPA : 8.54 | Aug. 2023 - Present |
| • School of Engineering and Technology CSJM University Campus | Kanpur, India |
| Bachelor of computer Application ; Aggregate :72.6% | 2020 - 2023 |
| • Kshetriya Inter College | Sirsaganj, India |
| UP Board Class XII ; Division : First | 2018 - 2019 |
| • Arya Janta Inter College | Sirsaganj, India |
| UP Board Class X ; Division : First | 2016 – 2017 |

PROJECTS

University Database Management System ([GitHub - jadonharsh123/University_database-korth](https://github.com/jadonharsh123/University_database-korth))

- Developed a comprehensive database management system utilizing Python for backend logic, MySQL for data storage, and HTML for the user interface, ensuring a streamlined user experience.
- Implemented key features to optimize data storage, retrieval, and management processes, improving the efficiency of handling university-related records, including student, faculty, and course information.
- Applied advanced SQL queries to enhance data retrieval speed, ensuring scalability and performance in managing large datasets.

Web scraping application (<https://github.com/jadonharsh123/Web-Scraping-Tool-with-BeautifulSoup>)

- Developed an automated web scraping tool using Python, leveraging the BeautifulSoup library for efficient HTML parsing and data extraction from dynamic websites.
- Utilized the Requests module to retrieve web page content and employed Pandas to process and export the extracted data into structured CSV formats.

CERTIFICATIONS AND PROGRAMS

- Google IT Automation with Python, Coursera, Grow with Google
- Google Cyber Security
- Ethical Hacking and Penetrating Testing, C-DAC Noida
- Oracle Certified Foundations Associate, Oracle University

WORK EXPERIENCE

Research Intern | ISEA Project Phase-III | MNNIT Allahabad

Dec 2024 - Feb 2025

- Selected for a prestigious internship in the *Department of Computer Science & Engineering at MNNIT Allahabad* under the *Information Security Education and Awareness (ISEA) Phase-III Project*, sponsored by *MeitY, Government of India*.
- Worked on Intrusion Detection Systems (IDS), leveraging machine learning and data balancing techniques to improve cybersecurity measures.
- Developed and optimized classification models using Random Forest, LightGBM, XGBoost, KNN, Logistic Regression, Decision Tree, and Naïve Bayes for multi-class intrusion detection.
- Implemented hybrid data balancing techniques (SMOTE-ENN and PCA) to handle dataset imbalances and improve detection accuracy.
- Conducted data preprocessing, including handling missing values, feature encoding, feature scaling, and dimensionality reduction for efficient model training.
- Evaluated model performance using accuracy, precision, recall, F1-score, ROC-AUC, and confusion matrices, achieving over 90% accuracy with balanced data.
- Gained hands-on experience with Python programming, utilizing libraries like Pandas, NumPy, Scikit-learn, Matplotlib, and Seaborn for data analysis and visualization.

Project Intern | Cybergyan | CDAC, Noida | Remote

May 2024 - June 2024

- Completed a focused internship program in Cybersecurity and Ethical Hacking, gaining hands-on experience in securing network infrastructures and conducting penetration testing.
- Developed expertise in identifying and mitigating vulnerabilities through practical exposure to tools like Nmap, Metasploit, and Wireshark.
- Contributed to real-world simulations, performing ethical hacking exercises to identify potential security risks and propose actionable solutions.
- Strengthened knowledge in areas such as encryption, firewall configuration, and vulnerability assessments to safeguard sensitive data.
- Earned a certification upon successful completion, demonstrating a strong foundation in cybersecurity principles and ethical hacking methodologies.
